

Gift Pouch Instructions

To make 1 gift pouch you need:

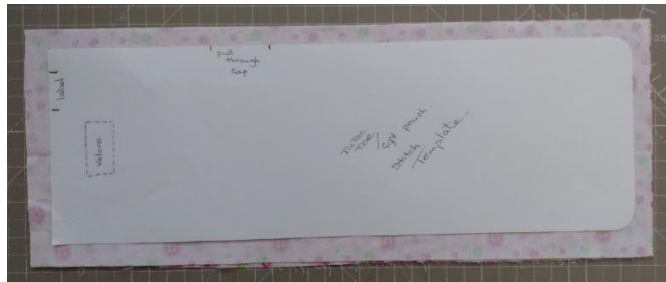

- 2 18" x 7" fabric
- 1 label
- 1 1½" Velcro
- 1 stitch template

Instructions

Place the 2 main body pieces right sides together making sure the edges are aligned.

Lay the sewing template over so that it is equal all the way round. Either use a pencil to mark the stitch line or pin the template securely so it does not move while sewing. Position the folded label in the seam allowance as marked on the stitch template, with the raw edges poking outwards.

Sew round the template guide/marking. Don't forget to leave a gap to turn it through. See marked on the template.

Trim the corners and snip the curves where necessary.

Turn through, working the curves and corners out for a smart finish. Press.

Fold down the label and top stitch 1/8th from the edge.

Sew on 1 part of the Velcro as marked on the template.

Fold up 7" from the squared short edge to form a pouch. Fold over & top stitch 1/8" from the edge around the sides and flap.

Sew the remaining piece of Velcro on the inside of the flap so that it will fasten closed. Thank you
