

Sleep Mask Pouch Instructions

To make 1 pouch you need:

2 10" x 14" fabric

1 label

1 stitch template

Instructions

Place the 2 main body pieces right sides together making sure the edges are aligned. Lay the sewing template over so that it is equal all the way round. Either use a pencil to mark the stitch line or pin the template securely so it does not move while sewing. Sew round the template guide/marking. Don't forget to leave a gap to turn it through. See marked on the template.

Trim and snip the corners and curves where necessary.

Turn through, working the curves and corners out for a smart finish. Press.

Fold up 4" from the squared short edge to form a pouch. Take a folded label & insert it in the gap used to turn through. Fold over & top stitch $\frac{1}{8}$ " from the edge.

The snap fastners will be added at HQ
